

WHISCO TV 1.0 (BUILD 8) — GUIDELINE 5.2.2

Submission: c80e30c4-5e07-4911-bb77-2ed58fd09caf

This binary is version 1.0, build 8. It plays eight official news live streams and no on-demand titles. The cap is enforced by the API. The app sends header X-Whisco-Store: ios. That header returns eight live rows and zero on-demand rows. A title outside that set returns HTTP 404.

Build 7 included eight public-domain films. Those titles are not in this binary. The 15 September screenshot of 615 live channels is build 5 and cannot appear here.

Each live item is the broadcaster's own 24/7 news on its own verified YouTube channel, played in YouTube's embed. We do not copy, store, or re-serve the file. No save / rip / export. No M3U. No Xstream. No user-supplied stream URL.

Live eight
